

## MYOPIA HUNT CLUB

### INTERN STUDENT WANTED

#### **Myopia Hunt Club**

435 Bay Road  
South Hamilton, MA 01982  
Attention: David A. Heroian, CGCS

Myopia Hunt Club is a private 18 hole links style golf club established in 1894. Having hosted four of the early U.S. Opens, it is considered a landmark American golf course with strong ties to the early Scottish traditions. Myopia is currently ranked by Golf Week and Golf Magazine as one of the top 100 golf courses in the country.

The intern is expected to learn the basics of turf and golf course management as well as the technical requirements. We consider this position as a training ground to prepare the student for obtaining at least an Assistant Superintendent position. The student will be required to obtain a Massachusetts pesticide applicators license and Myopia will cover all expenses in this process. The student will be required to master chemical and fertilizer calibrations and applications as well as full knowledge of all fertilizers and pesticides used. The student will be involved in irrigation repairs and programming as well as minor equipment maintenance. For one week towards the end of the summer the student will be given the opportunity to manage the daily operations of the twenty-four man labor force, as well as watering schedules. We have found this to be a very beneficial experience in preparing the student for a job as an Assistant Superintendent. Hours will range from 40- 60 hours depending on weather conditions as well as work schedules. Workers will have every other weekend off but will be expected to work the weekend day for a full day depending on weather conditions. We are currently in the middle of a restoration process under the direction of architect Gil Hanse. This includes green and fairway expansions as well as bunker construction.

COMPENSATION: \$11.00/HR

HOUSING: We have a room available on property and provide for two meals a day at no charge.
