Moraine Country Club – Student Intern Information

Contact: Jason Mahl, Golf Course Superintendent
Location: 4075 Southern Blvd., Dayton, OH 45429
Phone: (937) 293-8189
E-mail: Jason@morainecountryclub.com
Website: www.morainecountryclub.com
Fax: (937) 424-5628
Wage: $10.00 / hour
Other: Housing available, lunches during week, uniforms, golfing privileges

Internship Responsibilities:
Interns at Moraine Country Club are heavily involved in all aspects of golf course maintenance. Along with daily mowing on all surfaces, interns will be involved in the calibration and application of fertilizers and pesticides, hand-irrigation on all playing surfaces, troubleshooting and repair on various aspects of the irrigation system, ornamental bed maintenance, and various golf course improvement projects throughout the season.

If interested, please send hard copy of cover letter and resume to address given above, as well as an electronic copy of both cover letter and resume.
Moraine Country Club is a private, 18 hole country club located in Dayton, Ohio. Designed by Alec "Nipper" Campbell, Moraine opened in 1930. For the past 83 years, Moraine has offered a championship quality golf experience for its members and their guests. Perennially chosen as a "Top 100 Classic Course" by GolfWeek, Moraine has hosted several tournaments throughout the years, including the 1945 PGA Championship, 1979, 1989, 1999, and 2009 Ohio Amateur Tournaments, as well as multiple US Open Qualifying Tournaments. A true hidden gem in the world of golf, Moraine’s golf course offers a true test to all handicaps with most of the property still in its original form.

In 2008, golf course architect Keith Foster was hired to develop a Master Plan for a golf course restoration. This plan included the establishment of over 40 acres of native grass areas, as well as rebuilding green complexes, a complete bunker renovation, as well as re-grassing tees and fairways. While some work has been completed in-house, the remainder of the project is forecasted to be complete by 2016. A greens nursery, built to USGA specifications, was constructed in the fall of 2013 to aid in on-site research while finalizing various aspects of the project.

Moraine Country Club is currently in the process of adding interns to the Turf Staff for the 2014 season. We offer a rewarding internship program, as participants will be involved in many aspects of golf course maintenance. With opportunities to work closely with the management team, interns will be involved in all daily mowing activities, calibrating and applying fertilizers and pesticides, hand irrigation on all fine turf areas, troubleshooting and repairing irrigation heads, as well as involvement in various small projects throughout the season.

This internship opportunity is a great way to better understand what goes into providing the highest possible playing conditions on a consistent basis, all through hands on involvement with our team at Moraine Country Club.

Internship Benefits:
• Housing
• Uniforms
• Meals provided during week
• Golfing privileges

We hope you will take interest in joining the team at Moraine Country Club. Through hard work and first hand experience, the internship program is one designed to better prepare individuals for successful careers in the Turfgrass Industry.
